

The screenshot shows the Visual Studio Code editor with a Terraform configuration file named `ec2.tf` open. The file contains a resource definition for an AWS instance named `testsiet` and an output for its public IP address. The terminal at the bottom shows the output of a Terraform command, indicating that the instance was successfully created and its public IP address is `54.196.147.60`.

```
1 resource "aws_instance" "testsiet" {
2     # Instance type, key pair, and security group
3     ami           = "ami-0c55b159e974c7908"
4     key_name       = "test-keypair"
5     vpc_security_group_ids = [ "sg-0f9ff34f35359c9e8" ]
6     tags = {
7         Name = "testsiet"
8     }
9 }
10
11 output "testsiet_public_ip" {
12     value = aws_instance.testsiet.public_ip
13 }
```

Terminal Output:

```
aws_iam_user.sietdev: Destroying... [id=sietdev]
aws_s3_bucket.siet_bucket: Destroying... [id=devopsdemo-pooja-2026]
aws_s3_bucket.siet_bucket: Destruction complete after 1s
aws_iam_user.sietdev: Destruction complete after 1s

Apply complete! Resources: 0 added, 0 changed, 2 destroyed.

Outputs:

testsiet_public_ip = "54.196.147.60"
PS C:\Users\Pooj\Desktop\terraform practice>
```

The screenshot shows the AWS Management Console interface for the 'Instances' page. The instance `testsiet` (ID: `i-088cbf28769e51593`) is shown in a 'Running' state. The console displays various details about the instance, including its public and private IP addresses, DNS information, and a summary of its configuration.

Name	Instance ID	Instance state	Instance type	Status check	Alarm status	Availability Zone
testsiet	i-088cbf28769e51593	Running	t3.micro	Initializing	View alarms +	us-east-1c

i-088cbf28769e51593 (testsiet)

Instance summary

Instance ID	Public IPv4 address	Private IPv4 addresses
i-088cbf28769e51593	54.196.147.60 open address	172.31.20.223

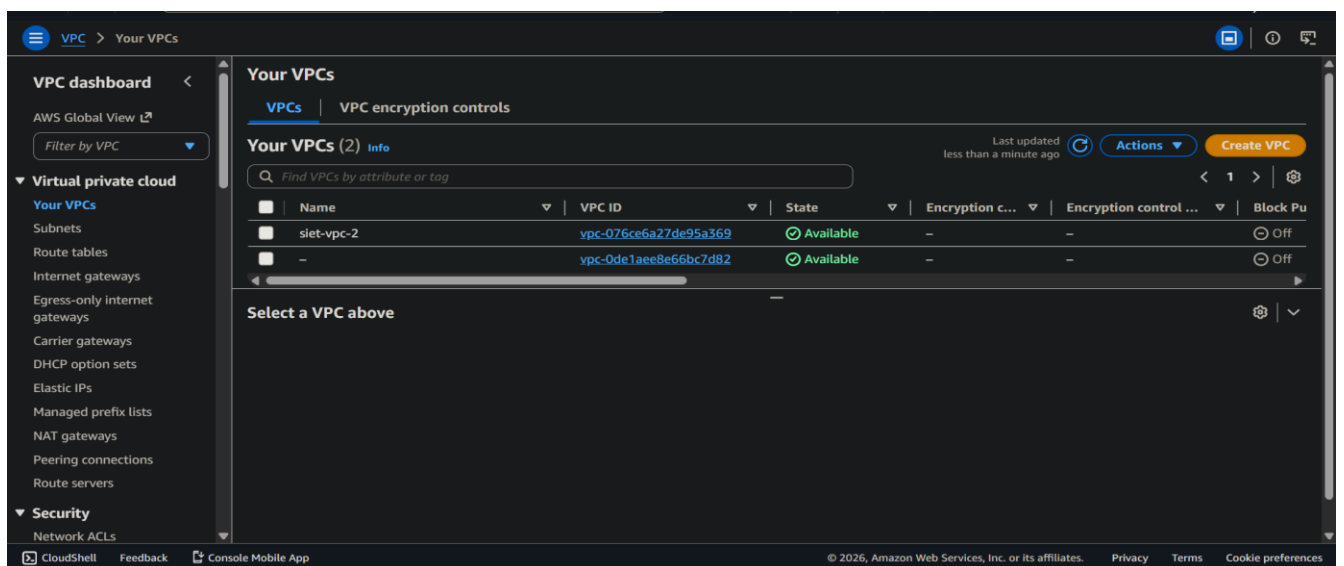

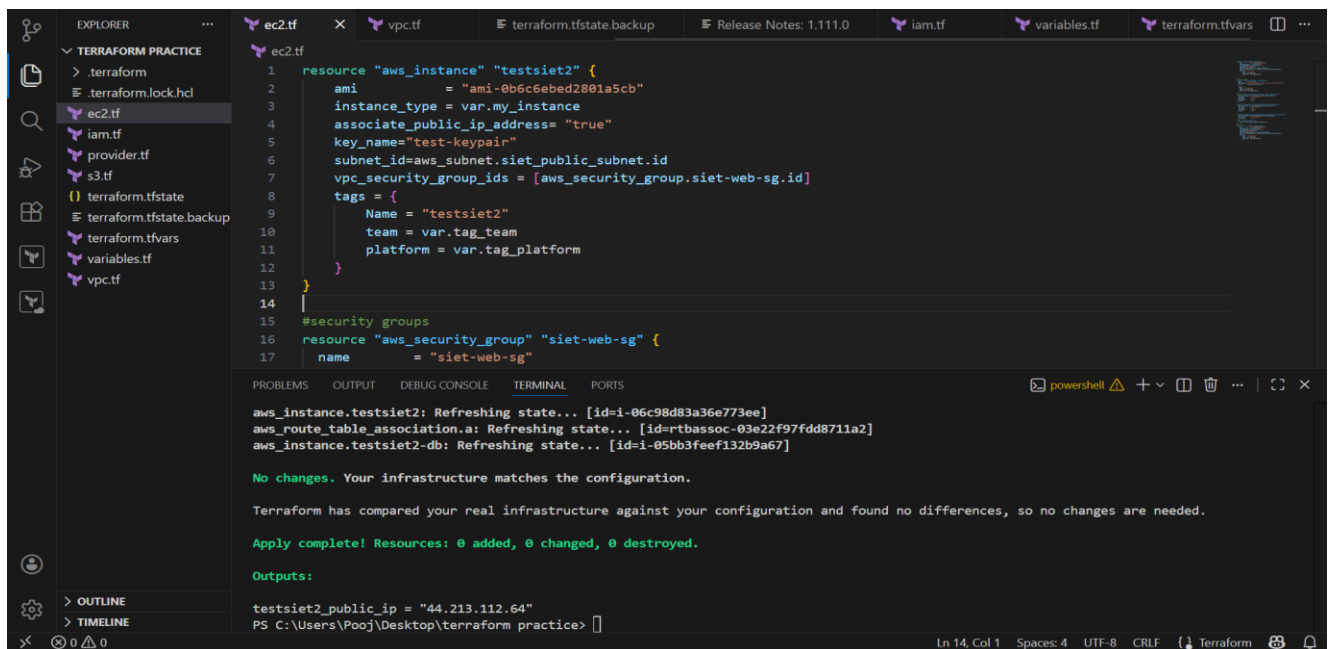

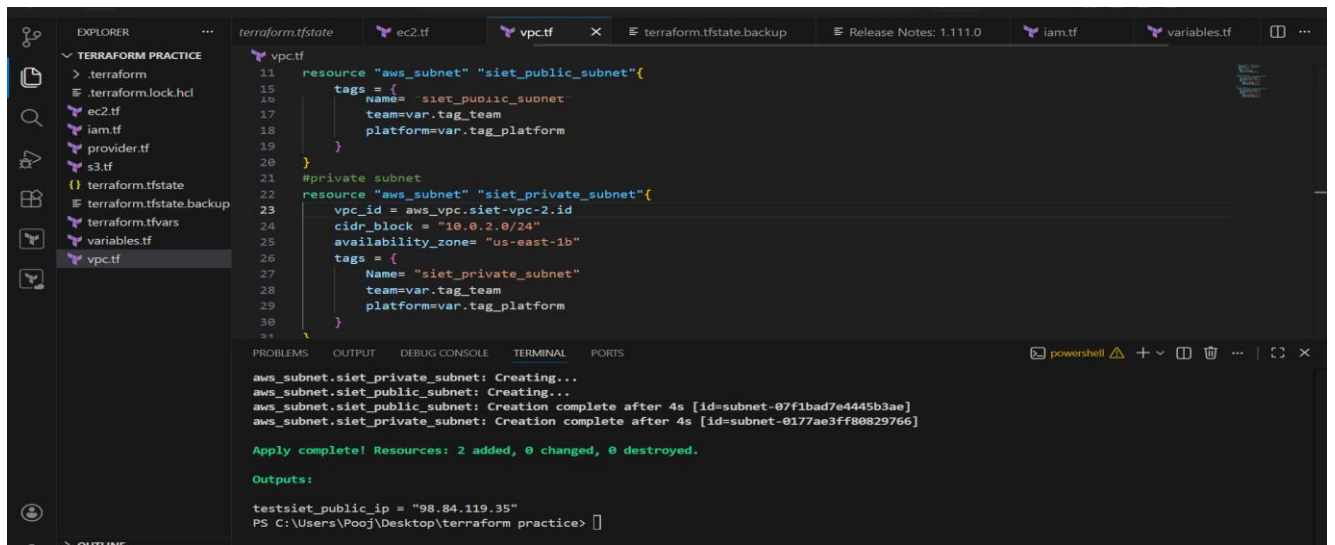

Instance state: Running

Public DNS: [ec2-54-196-147-60.compute-1.amazonaws.com](#) | [open](#)

The screenshot shows the AWS Management Console interface for the 'VPCs' page. The VPC `test-siet-vpc` (ID: `vpc-054f1fec0375e0ccc`) is shown in an 'Available' state. The console displays various details about the VPC, including its encryption controls and a summary of its configuration.

Name	VPC ID	State	Encryption c...	Encryption control ...	Block Pu
test-siet-vpc	vpc-054f1fec0375e0ccc	Available	-	-	Off
